

XM Satellite Radio is an invaluable service providing up to the minute weather and traffic information in the Boston area and in areas to which I travel. No other radio service provides me with information about traffic and weather conditions in cities where I plan to travel. The National Association of Broadcasters should not be allowed to dictate what I choose to listen to on a satellite system that I pay for. I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide me with the kind of programming that I cannot receive on other radio stations.
